SMARTBRIDGE
Let's Bridge the Gap

Empathy Map Canvas

Ideation Phase: Empathize & Discover

SKILLWALLET
A SmartBridge Product

Date	31 January 2026	**Team ID**	TEAM-FUEL-08
Project Name	Global Fuel Price & Taxation Trends	**Maximum Marks**	4 Marks

Empathy Map Purpose: Understand the target user's behaviors, statements, internal thoughts, and feelings when interacting with global fuel price data, taxation metrics, and Brent crude price variations.

SAYS

- "Why are petrol tax rates in European countries so much higher than in other regions?"
- "We need clear visibility on how Brent Crude fluctuations affect retail petrol prices."
- "Low-income countries show drastic price spikes compared to high-income counterparts."

THINKS

- High fuel taxation policies directly disincentivize carbon consumption in developed economies.
- Developing nations require tailored fuel subsidization to maintain domestic supply chains.
- A single dashboard must unite price, taxation, and income brackets seamlessly.

Neha Rathore

Energy Economist & Policy Strategist

DOES

- Cross-filters country-level tax rates against average fuel prices in USD/Liter on Tableau.
- Monitors monthly Brent crude price movements against regional retail fuel prices.
- Presents analytical reports to government bodies and logistics executives.

FEELS

- **Concerned** about economic inflation driven by erratic fuel tax spikes.
- **Empowered** when interactive data reveals clear global taxation correlations.
- **Determined** to advocate for transparent global fuel pricing frameworks.
