Project Name	Global Fuel Price & Taxation Trends	**Maximum Marks**	4 Marks

Solution Architecture Flow

Component Description Table

Component Name	Description / Role in Architecture	Technology Used
Data Sources	Provides standardized weekly/monthly international fuel pricing (`petrol_usd_liter`, `diesel_usd_liter`, `lpg_usd_liter`), tax percentages, and Brent crude oil benchmarks.	GitHub Repository CSV (`global fuel/`)
Data Ingestion Layer	Establishes connection pipelines and imports raw energy economic data into the data preparation workspace.	Tableau Connectors / SQL Extracts
Data Preparation & Logic	Cleans, normalizes pricing into USD/Liter, joins tax ratios, and categorizes nations by income brackets (High/Middle/Low) and subsidy levels.	Tableau Prep / SQL Transformation
Analytics & Storage Layer	Stores optimized extract models and executes analytical KPI calculations (Average Petrol Price, Tax Relationships, Brent Crude Volatility).	Tableau Data Engine / Hyper Extracts
Reporting & User Interface	Generates interactive Tableau Public views including Global Maps, Scatter Plots, and Bar Chart dashboards.	Tableau Public / Interactive Embeds
