Project Demo Planning

Date	15 March 2026	Team ID	en25cs3030039DS
Project Name	Global Fuel Price and Taxation Trends	Maximum Marks	1 Mark

A well-structured demonstration plan ensures an effective presentation of the Global Fuel Price and Taxation Trends platform, covering the Snowflake data engineering pipeline and Tableau Public analytics dashboard.

PROJECT DEMO AGENDA & STRUCTURE

S.No	Demo Section	Description	Duration	Responsible
1	**Introduction & Domain Context**	Overview of global fuel market volatility, macroeconomic tax variations, and project objectives.	2 mins	Project Lead
2	**Snowflake Data Engineering**	Demonstrating database schemas, median null imputation, deduplication, and staging view creation.	3 mins	Data Engineer
3	**Tableau Dashboard Live Demo**	Interactive walk-through of 8 key visualizations (Income Tiers, Brent Crude benchmarks, Tax maps).	5 mins	BI Specialist
4	**Business Insights & Outcomes**	Highlighting key findings: High Income index (35,050) vs Middle (13,953) and regional price spreads.	3 mins	Data Analyst
5	**Scalability & Architecture**	Explaining Snowflake performance test results, query cache efficiency, and future API roadmap.	2 mins	System Architect
6	**Q&A & Evaluator Feedback**	Addressing evaluator questions regarding data quality, tax correlations, and repository code.	5 mins	All Team Members

DEMO FLOW SUMMARY

Step	Activity	Notes / Key Takeaways
1	Introduction & Problem Statement	Frame the challenge of unstandardized international fuel pricing data (2020–2026).
2	Solution Overview	Present the integrated Snowflake SQL Data Warehouse and Tableau Public architecture.
3	Live Feature Demonstration	Showcase real-time dynamic slicing across regions, date ranges, and country income brackets.
4	Q&A Session	Validate repository code, quality checklist status, and performance test latency metrics (<250ms).
